Re: Renegade Parts Washer

Dear Ms. Wilcox:

After a review of the materials sent to this office by your company, we do not foresee any problems associated with a discharge of this material into the Kent County Regional Wastewater Treatment Facility. There are currently no specific limitations on the discharge of parts washers into our system.

Please keep in mind that any industrial user who discharges this material to our system may be subject to the Sanitary Standards found in the Kent County Code at Chapter 180. Industrial users planning to switch to this system must inform this department of the proposed changes and provide appropriate information with regards to total industrial discharges. An evaluation will be made by this department of the acceptability of their wastewater at the time of the change.

This does not prevent the department from ceasing to accept this type of discharge should problems occur that can be directly traced to the discharge of the parts washer wastewater.

If you need additional information or have additional questions or concerns, do not hesitate to contact me at 302-335-6000.

Sincerely,

Jim Newton, P.E., BCEE
Environmental Program Manager
