Re: Disposal of Wastes

Dear Ms. Wilcox,

On your May 16th email to me you introduced us to "Renegade" (parts washer cleaner product you provide to businesses). You indicated that either a commercial business or industry usually discharges about 20-40 gallons of the spent cleaner 3-4 times a year. You submitted an MSDS on the detergent, and a lab analysis on the spent waste from a commercial business, which indicate no hazards and some trace metals. It appears not to be of concern, however we're subject to Nebraska Department of Environmental Quality's Pretreatment Program, and they may have more restrictive regulations than our City Code. You may want to contact them as well.

Contact us if you need anything further.

Sincerely,

City of Norfolk,
Todd Boling, Wastewater Superintendent
