RE: Request to allow discharge of product from parts cleaning activity

Dear Ms. Wilcox;

Pretreatment staff has reviewed the referenced discharge request to allow users in the City of Wichita to discharge the Renegade Degreaser product into the City sanitary sewer system. Based on the proposed volumes, frequency of discharge, and the concentration of the pollutants included in the MSDS that you submitted, it is acceptable to discharge this material as described in your written request dated 3/29/06.

If future activities and /or stricter regulations result in finding that this material is unacceptable, then the user will have 60 days to seek alternative methods of disposal after notification of unacceptance by the City.

Allowing the use of this product should not be construed as endorsement of this product or any other material associated with Renegade Parts Washers. Use of this material indicates that the User agrees to hold harmless the City of Wichita and its representatives, from any liabilities associated with use and discharge of this product. Please contact me at 316-303-8703 if any questions. Thanks for your inquiry, and efforts to comply with local environmental regulations.

Sincerely;

Rebecca Gagnon  
Pretreatment Administrator
